SUMMARY

Final-year Software Engineering student at Universiti Malaysia Terengganu with hands-on experience in full-stack web development, DevOps, and AI integration. Proficient in Java Spring Boot, Next.js, TypeScript, Docker, and CI/CD pipelines. Experienced in leveraging AI tools to accelerate development workflows. Passionate about building intelligent systems and cloud-native applications. Open to internship opportunities across Malaysia, remote, and Singapore.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS, SQL, MicroPython

Frameworks & Libraries: Next.js, React, Spring Boot, Tailwind CSS, REST API, Selenium

DevOps & Cloud: Docker, GitHub Actions, CI/CD pipelines, AWS, Vercel, Supabase (PostgreSQL), Cloudinary

AI & Tooling: AI chatbot integration, AI-assisted development (Claude, GitHub Copilot), prompt engineering

Tools & Platforms: Git, GitHub, VS Code, Postman, Raspberry Pi Pico W, IntelliJ, PowerBI

WORK EXPERIENCE

Assistant Software Developer (Internship)

Nov 2022 – May 2023

SIM IT SDN BHD · Johor Bahru, Johor

- Participated in the full software development lifecycle (SDLC), contributing to both front-end and back-end development tasks under senior developer supervision.
- Debugged and resolved software defects by analysing code logic, reproducing issues, and implementing fixes — reducing outstanding bug count across multiple modules.
- Collaborated with the development team during sprint reviews and testing phases, supporting code reviews and assisting in feature implementation.
- Documented technical findings and bug reports to maintain clear communication between development and QA teams.
- Implement Software Automation Testing to accelerate testing phase.

PROJECTS

MPP Facility Management System

2025 – Present

Final Year Project (FYP) · Web Application

- Developing a full-stack facility management web system for a university student body (MPP) using Java Spring Boot (REST API backend) and React (frontend), with a relational database for booking, reporting, and resource management.
- Integrating an AI chatbot feature powered by a large language model API, enabling users to query facility availability, submit requests, and receive automated responses through a conversational interface.
- Implementing role-based access control (RBAC) for admin, staff, and student roles, with a structured approval workflow for facility booking requests.
- Applying CI/CD practices using GitHub Actions for automated build and deployment pipelines, ensuring consistent code quality through automated testing stages.
- Leveraged AI-assisted development tools throughout the project to accelerate boilerplate generation, debugging, and code review — reducing development time significantly.

Sakti PLC – School PLC Reporting System

2025 – Present

Real-World Deployment Project · Web Application · Live at SMSKT

- Built and deployed a production web application currently in active use at a secondary school (SMSKT), enabling teachers to submit Professional Learning Community (PLC) meeting reports digitally.
- Developed using Next.js, TypeScript, and Tailwind CSS, with Supabase (PostgreSQL) as the database and Cloudinary for media storage — hosted on Vercel.

Smart Flood Detection System

2025

IoT Lab Project · Embedded Systems

- Programmed a Raspberry Pi Pico W using MicroPython to read ultrasonic sensor (HC-SR04) data and transmit real-time readings to ThingSpeak for cloud-based flood monitoring.

EDUCATION

Universiti Malaysia Terengganu (UMT)

2023 – Present

Bachelor of Software Engineering

Relevant Coursework: Software Requirements Engineering, Web-Based Development, OOP, Cybersecurity, Software Project Management, Software Architecture

Politeknik Sultan Idris Shah

2020 – 2023

Diploma in Information Technology (Software Development) · **CGPA: 3.85**

Relevant Coursework: Programming Fundamentals, Software Architecture, Data Structures, OOP, Software Requirement & Design, Web Design Technologies, Web Programming

ADDITIONAL INFORMATION

Languages: Bahasa Melayu (native), English (proficient)

Interests: AI/ML integration, DevOps & CI/CD, cloud-native development, full-stack web engineering

Location Flexibility: Open to on-site (Malaysia), remote / WFH, or Singapore-based internship placements.

Internship Duration: 3 August 2026 – 15 January 2027, 6 months, 24 Weeks
